SCHOOL OF HYGIENE AND PUBLIC HEALTH

INSTITUTE FOR INTERNATIONAL PROGRAMS

July 12, 1991

Mr. Hubert A. Allen, Jr.
2921 Elliott Street
Baltimore, MD 21224

Dear Hubert:

I wanted to thank you for the excellent job you did in developing the first phase of a health information system for the Foundation for the Peoples of the South Pacific/Vanuatu project. I am extremely impressed by the thorough documentation and the practicality of the system. You also were remarkably patient in demonstrating the draft manual and the basic computer screens to us so that our staff and FSP would participate in each step of development. I have requested Richard Scott, our administrator, to release the final payment of \$2,475.97 owed you.

I believe your system is the best direction in which to move with the different PVOs, but the process of achieving that is a slow one. I hope the World Vision contact will lead to assisting them with the long term needs in project-based health information systems.

Your work is extremely professional and valuable to the Child Survival Program. When the next opportunity presents itself, we will call on you to develop a computerized HIS. I also hope that we can work out your participation in one of the workshops that will be held this coming year, as I think project participants need first-hand exposure to what you have developed.

Thank you very much for all your excellent work.

Sincerely,

Dory Storms, Sc.D.
Director
PVO Child Survival Support Program
